

## **Description of Oval Coconut Shells:**

Oval Coconut shells are processed in a way which is suitable for food packaging. Once the Coconut is cut, it is emptied of its pulp, the outside and the inside of the shells are well polished, washed and treated, so that the smell is neutralized. The shells are dual washed in fresh water and dipped in 4% Chlorine solution, then the shells are dried and they are packed in carton box enclosed with polyethylene sheet. Once processing is over the Coconut shell is extremely clean and hygienic. The shell is free of any pulp or dust or smell.

## **Colour of the Coconut Shell:**

The shell retains its original colour – Brown, after the processing is completed.

## **Specifications:**

### **Coconut Shell – Oval Size:**

We do coconut shells from size **120ml to 250ml** which depends on the customer requirement.

Coconut shells being a natural product may have some variations in the length, height or diameter, but we assure you that the **volume** or the **holding capacity of the shells will be maintained as per the customer requirement.**

Our Coconut shell will be free from any contaminants, pesticides or plant pathogens, as we are very strict about our quality.

## **Storage:**

Once processed, our shells are stored in a clean, dry and well ventilated room, protected from the sun.

## **Packing:**

The Coconut shells are packed in carton boxes lined with food grade blue polyethylene bags.

## **Shelf Life:**

2 years from date of packing, stored at ideal, clean and dry conditions.
